Abstract (en)  
[origin: EP0751266A1] The block has two long walls forming an outer wall (1) and inner wall (2) connected together by one or more cross walls. The outer wall has crossmembers (4) directed towards the inner wall and designed to fit over at least one of the cross walls (3). The inner or outer walls can be corrugated on their sides facing the cross walls. The outer wall which is made of insulating material is connected to the cross wall by dovetailed connecting members. The outside of the outer wall can have dovetailed recesses (14) to hold a plaster foundation. A metal mesh can be attached to the outside of the outer wall or laid in the plaster.
