Abstract (en)

[origin: EP0751292A1] The starter (10) includes the electromagnetic contactor (14) held in an upper casing, with the auxiliary command relay held in an extension to the electromagnetic contactor casing. A main coil is connected to the battery by the auxiliary command relay (32) which has a moving coil (40) which connects up to connector pads to connect the main coil and the wire to the battery. The main coil has an isolating cap (50) with an extension piece (62) covering the relay.
