Abstract (en)

A film stamping device for stamping out an end of a film strip comprises an upper cutter (134) held for up and down movement relative to a stationary anvil (5) or a stationary lower cutter by a cutter holder and film guide means located before the anvil (5) or the lower cutter for guiding a film strip (F), the upper cutter having a cutting edge shaped in conformity with a given contour for shearing or cutting an end of a film strip to the given contour when the upper cutter is pressed downward against the anvil (5) or the lower cutter by pushing down a stamping handle (32).
