Abstract (en)  
[origin: US5697517A] PCT No. PCT/DE95/00277 Sec. 371 Date Sep. 16, 1996 Sec. 102(e) Date Sep. 16, 1996 PCT Filed Mar. 2, 1995 PCT Pub. No. WO95/25317 PCT Pub. Date Sep. 21, 1995The invention relates to a dispensing unit for banknotes (42), comprising a banknote container (12) and a receiving module (14) which is in the form of the frame into which the banknote container (12) can be pushed. The unit includes an extracting and separating device for extracting banknotes (42) through an opening of the banknote container. The opening can be closed by a flap (26) and a closure plate (30). A retracting element (34) presses the banknotes against the extracting device by a force (P), before the flap is closed. The banknotes which are located in the banknote container are thereby forced away from the opening, back into the container interior. The retracting device is displaced in the direction of the extracting device (34) until the banknotes (42) come into the extracting position.
