Abstract (en)
[origin: WO9526029A1] A container for nuclear fuel assemblies including a cylindrical body made of thick wrought steel defining an inner space for housing said assemblies, said space being sealable at both ends by plugs also made of metal, wherein the cross-section of the cylindrical body is non-circular and the outer wall thereof generally includes planar portions parallel to the planar surfaces of crescent-shaped members attached to the inner wall of the body, whereby said cross-section is shaped like a square or rectangle with rounded corners.
