Abstract (en)
The sole is of the type that is comprised of a bottom part or sole (1) upon which the top part or front part of the sole (2) couples, the sole (1) having a low top perimetric extension (3) that begins from the edge thereof and whose contour (4) is irregular defining fanciful shapes. The front part of the sole (2) has in its side perimetric wall a shoulder (5) made in the bottom part of said perimetric side wall, whose contour (4) adapts exactly to the contour of the top perimetric extension (3) of the sole (1), all so that upon carrying out the assembly on the front part of the sole (2) on the sole (1), one adjusts perfectly with the other, in such a way that the perimetric side wall of both pieces remain perfectly aligned one being flush with the other.
