Abstract (en)
[origin: EP0752569A2] The heat exchanger arrangement comprises collection tubes (5,6) which penetrate both sides of an outer cover (2) of the heat exchanger (1). The collection tubes are connected to the outer cover in a pressure tight manner on the inlet and outlet sides. The tubes are each led into a receiving space (11) formed pressure tight with the outer cover. The meandering tube (7) is enclosed by an inner housing (8).
