Abstract (en)
[origin: EP0753269A1] The boot has a supple boot (2) with a leg (5) and a sole (4). This has a transversal slot (7), under the arch of the foot. A stud under the sole cooperates with a binding on the board. A rigid stirrup (4) passes through the slot and goes up on either side of the leg and is inclined backwards. A back part (15) surrounds the back of the leg and its base (17) is articulated on the stirrup, at the level of the ankles and its inclination backwards is limited. The stud is on the lower surface of the stirrup.
