Abstract (en)

[origin: EP0754779A1] A process for the surface treatment of partially zinc coated (one side) steel plate, is claimed. The plate is treated with an aq. inhibiting soln. to deposit a homogeneous film on the surface before final oil protection. The soln. contains an alkali salt of a 6-12 C linear aliphatic monocarboxylic acid, a hydrocarbyl triazole or diazole and a non-ionic surfactant, the pH of the soln. being maintained < 7.
