Abstract (en)  
[origin: EP0754826A2] The handgrip (1) has a throat section (3) with a bearing section (6) at least insertable partly in the through passage (17) and extending out of a face surface (5) of the throat section. The bearing part (11) has components formed by elastically pliable segments of the peripheral wall for compensation of slight mfg. or installation inaccuracies. The handgrip also contains a bearing groove (9) formed in the face surface of the throat section and a bearing collar (19) fitted on the bearing part and extending with clearance into the bearing groove. The bearing groove is limited by a blunt conical inner wall. The bearing collar is blunt conical in shape.
