Abstract (en)

[origin: EP0754831A1] A fixture (1) is fixed to the bottom corner of the casement (5) in its fold (7). A separate mounting (3) has a hinge (23). The fixture and mounting are adjustably joined by fastenings (33). The fixture and mounting have facing coupling surfaces (17,29) parallel with the vertical fold surface (7) of the casement and adjustable in position by the fastenings. The fastenings press the two coupling surfaces against each other either directly, or via, at least, one intermediate insert (41).
