Abstract (en)  
[origin: EP0754866A2] The arrangement has several valve units (2). Each unit has two main valves (13, 14), located above each other at right angles to the plane (5), in which the units are positioned. The base plate (8) of each unit is formed as a common housing for the two valves. It has two parallel holders (15), above each other, for a slide (16). At least one feed channel (22) and one relief channel (23) extend in the intermediate wall (31) of the base plate between the holders, and simultaneously communicate with both slide holders.
