Abstract (en)

[origin: EP0754905A1] The indicating light includes a socket (50) closed by a warning cover (70) and holding at least one lamp. A number of conductive bands (10a,b) are disposed at the rear of the socket and connected to part of a cap of the or all of the lamps, and another part connected to a connector (20) designed to receive a complementary electric connector (80) of the vehicle. The conductors have a spring clip connector section (101a,101b). The connector (20) has two leg connector pairs (21a,21b) which fit into the spring clips. To make the connection, the connector is merely forced into the spring clip connections. The connector is fixed on a lamp support (60) and the conductive bands (10a,b) receive a number of lamp bulbs (40).
