Abstract (en)

[origin: EP0754929A1] For the accommodation of the cartridge (7) by the weapon a pressure piece (2) is provided, which has a cylindrical projection, which extends into a hole of a matrix (6). In the hole in the area of a mouth of the cartridge casing (10) and of the peripheral groove an elastic ring (14) is arranged. A face surface of the elastic ring faces the face surface of the cylindrical projection and the second face surface locates via a sealing disc (15) on two slides (16) which are positioned vertically to the longitudinal axis of the cartridge in the matrix. The elastic ring is made of Vulkolan (RTM) of the Adipren (RTM) type.
