Abstract (en)

It is described a key-locked electromechanical safety switch comprising a control head (4) provided with a cam actuator (8), a pusher (9) for switching over electrical contacts (3) operated by the cam actuator (8), an operating key (7) insertable into a slot formed in the control head, and a tempering-preventing device (12) having at least one safety element (13) adapted to block rotation of the cam actuator (8). <IMAGE>
