Abstract (en)

[origin: WO9527431A1] The present invention relates to a method of controlling a filter bag and cartridge cleaner cleaning system, whereby the opening of valves to allow passage of cleaning air into the filter bags or cartridges is dependent upon the attainment of a predetermined pressure existing in the header rather than the normal on/off timer control. There is also disclosed a control panel, components and a flow control device for use with a cleaning system.
