Abstract (en)

[origin: WO9528123A1] The invention relates to a brush cleaning device (10), especially for carpeting, with preferably electrically driven brushes (28, 32), in which the brushes (28, 32) are fitted to be vertically movable. In order to improve a brush cleaning device (10) as claimed in a technically simple manner, it is proposed that the brushes (28, 32) be securable in the vertically lowest position for treating the carpeting with a cleaning agent.
