Abstract (en)
[origin: WO9530594A1] The proposed cleaning bottle is made from flexible plastic and is used for cleaning injection guns used with polyurethane-foaming agents from pressurized canisters. The bottle has a sealing cap unit provided with an outlet aperture for the cleaning agent, and the sealing cap unit (3) has a connection piece (4) fitted centrally, said connection piece being circular in cross-section and having at least one elastic sealing lip (7) which runs concentrically around the connection piece.
