Abstract (en)

[origin: EP0755649A1] The wringer is attached to a support on a floor wiper with an operating pole. It consists of a body (12) made of flexurally elastic material with two squeeze rollers (20,22) pivot mounted parallel with each other and movable apart against an elastic pre-tensioning force. The basic body has a U-shaped cross-section. The side walls (14,16) of the basic body are joined by a grooved base. The top parallel lengthwise edges of the basic body's sides has bearings each consisting of at least two bearing shells (54,56). Each shell has an opening (58,60) for inserting a squeeze roller.
