Abstract (en)
[origin: EP0756059A1] The middle layer (6) has an inner layer (7) of block-bonded bars (7'), and two outer layers (8) made of panels (8') or block-bonded panels. The panels' fibres run in the bar's (4) longitudinal direction and across the direction of the fibres of the block-bonded bars. Two inset edge bands (9) on the narrow sides of the middle layer (6) are next to the end side of the wood. One side length of the cross-section of the inset edge bands exactly matches the thickness of the middle layer. Two covering plates (10) are bonded with, and cover, the middle layer and the inset edge bands.
