Abstract (en)  
[origin: EP0756266A2] The carrier has a length-adjustable first strap (3) which is attached to a first fixed point (5) near the wearer's right shoulder on the bottom part (2) of the case (1). The first strap is attached to a second fixed point (6) in the right half of the base of the underneath case. A length adjustable second strap (4) is attached to a third fixed point (7) near the left shoulder of the wearer on the underneath part of the case, and to a fourth fixed point (8) in the left half of the base of the underneath part of case. The first and second strap, in the wearer's shoulder part, are joined each to one end of a padded third and fourth strap (10,11). The other end of the third and fourth strap is joined in the middle in a fifth fixed point (9) in the top third of the back of the underneath part of case.
