Abstract (en)

[origin: EP0756358A1] The automatic machine process has a vertical magazine stack Å6Ü that has wire lengths located within in guide channels Å9Ü and are fitted with end contact elements by a processing unit Å1Ü. The system has a cross feed system in line with the guide channel. The items are moved by a handling system that has actuator rods that are to transferred into an ejector stage Å8Ü that has feed rollers directing the items to the delivery point.
