Abstract (en)
[origin: WO9625335A2] The invention relates to a transport container system suitable in particular for use in delivery services, in which there are combinable container components of various sizes, the length and width of which correspond to a uniform frame. A first part of the components is of a length corresponding to the width of the second part of the basic component, whereby the length of said other part of the basic component is a quadruple of the width of the first.
