Abstract (en)

[origin: WO9528542A1] The invention relates to a method and to a device (1) for the destruction of a product or products (100) stored in an alarm-protected safety enclosure, there being used a destructive agent (50) which, in response to triggering of the alarm, is distributed over the product or products (100) to mark and/or destroy the same. There is used a destructive device (1) which includes at least one first explosive substance (61) which, when the alarm is triggered, will act at least partially on the product or products (100) before the product or products are acted upon by the destructive agent (50) accommodated in the destructive device. The destructive device (1) comprises a profile or a housing (10) which accommodates at least one first explosive substance (61), this first explosive substance being located generally on a side (12) of the housing (10) which includes a destructive-agent (50) outlet zone (13).
