Abstract (en)

[origin: WO9529463A1] The invention provides a method and apparatus for manipulating graphics comprising, providing a first display (2a) of graphics to be manipulated, and a second display (2b) of graphics identifiers, each identifier being associated with a grouping of graphics in the first display, and providing means to enable manipulation of at least some of the identifiers in the second display to cause corresponding manipulation of graphics in the first display associated with the identifier or identifiers characterised in that means are provided to manipulate graphics in the first display such that a spatial relationship between the graphics in a first set of graphics is maintained. This enables the graphics to be more easily and speedily manipulated than would otherwise be possible.
