Abstract (en)  
The shuttering (10) is assembled from self-supporting shuttering walls (1a,1b) with an outer contour corresponding to that of the wall panel, made of a stable material with an outer surface which is roughened to allow anchoring of applied plaster. The shuttering has (2) opposing flat shuttering walls held at a required distance from one another by a number of transverse spacers (15). The shuttering walls may be made of metal with openings for seepage of the concrete providing the required surface roughness for the external surfaces to be plastered.

Abstract (de)  
Es wird ein Schalung zum Herstellen eines Baukörpers aus Betonformteilen, insbesondere aus Plattenbauteilen beschrieben, die einfach und zeitsparend zu verwenden ist. Zu diesem Zweck enthält die Schalung ein in der Umrißform des Betonformteils vorgefertigtes, selbsttragendes, verlorenes Schalungsformteil (1) aus einem formstabilen und mit einer Verankerungsrauhigkeit als Putzträger ausgebildeten, flächigen Schalungsmaterial. <IMAGE>
