Abstract (en)
[origin: DE19631617A1] A link plate part (4) is provided for fitment of a handle holder (7) by means of a cross link. The flap panels (3,3') are connected to one another articulatedly and with the link plate part around a longitudinal axis (L). The edges sections (5,5') provided on the longitudinal edges (8,8') of the flap panels are formed for accommodation in pockets on the longitudinal edges of the mop head. The link plate part is pivotable as far as the inside of the one flap panel (3) and is releasably connectable to it. Then, the unit comprising the one flap panel and the link plate part is pivotable on the inside of the other flap platform and is releasably connectable with it.
