Abstract (en)

[origin: EP0757908A2] The object of the invention is a humidifier (3) for use in a sauna stove (1), comprising a high vessel (4) open at the top, forming a store for the water to be vaporized. This is intended to be placed in the stone space (2), or similar, of the sauna stove, next to the source of heat, when in use the heat from the heat source vaporizes the water in the vessel (4), to spread steam to the sauna room. The humidifier (3) comprises at least one cup (6) to be placed on top of the aforementioned high vessel (4), in which there is a channel (7) to lead the steam from the lower vessel (4) through the cup to the sauna room. <IMAGE>
