Abstract (en)

[origin: EP0757937A2] A support strip (4) and a label strip (2) are prepared as a material strip (6) comprising adjacent subsidiary strips in relation to the strip longitudinal direction. On the subsidiary strips, on two sides, adhesive is applied (14). The material strip can comprise at least three subsidiary strips and can be folded along fold lines limiting the subsidiary strips. An adhesive (14) is applied to the label strip (2) and a sepn. medium (16) on the support strip. Also, the sepn. medium and the adhesive can be applied one after the other on the support strip.
