Abstract (en)

[origin: EP0758042A1] The distance holder (2) on the end remote from the foot (1) has an installation plate with a surface for fixture of a box (9) under plaster. The distance holder between the foot and the installation plate comprises at least two telescopable sections (5,6) of which one is connected to the foot and the other to the installation plate. The telescopable sections are pushable one in the other against the effect of a force and the installation surface is orientated at right-angles to the telescope direction of the distance holder. The installation plate is of a material capable of being screwed or nailed and the installation surface is pref. of honeycomb structure.
