Abstract (en)

[origin: EP0758044A1] The rubber-elastic or elastomer seal has a base part (10) with protruding sealing lip (13) which has a cavity (12) which is closed by the base part (10) and at least two arms of the lip (13). The lip seals stop sealing areas and/or glazing sealing areas. The lip may have a substantially triangular, such as right-angled triangular hollow cavity. One of the arms of the lip can close the cavity stands, at right angles, to the base part. The lip may have a moulded sealing arm (14) on the upper side remote from the anchor foot (11).
