Abstract (en)

[origin: WO9528863A1] The invention relates to a device for keeping food and beverages (8) cool by means of an openable container containing a removable freeze pack (7) attached to the inside of the ceiling of the container. The container comprises, according to the invention, an essentially plane base part (1) and a cup-shaped hood (2) open downwards and comprising the main part of the side walls (4, 6) of the container. The hood is intended to be placed on the base part (1) and is provided in its upper portion (3) with a means (14) for attachment of the freeze pack (7). The ceiling (3) of the hood and the main part (4) of its side walls are preferably made of untransparent material and the rest (6) of the side walls of transparent material.
