Abstract (en)

[origin: WO9529979A1] The present invention relates to fabric cleaning compositions comprising subtilisin BPN' variants, wherein the BPN' variant comprises one or more amino acid positions having a different amino acid than that occurring in wild-type subtilisin BPN' (i.e., substitution) at specifically identified positions, whereby the BPN' variant has decreased adsorption to, and increased hydrolysis of, an insoluble substrate as compared to wild-type subtilisin BPN'.
