Abstract (en)
[origin: WO9530815A1] The invention relates to a profiled fence post (1) made of polymer material reinforced with a number of continuous steel reinforcement wires (3) running in the longitudinal direction from one end to the other, which have a diameter ranging between 1.5 and 5 mm and are embedded in adherent relationship in said polymer material, and in which said reinforcement wires have an elastic limit of at least 1200 N/mm<2>, and preferably more than 1400 N/mm<2>.
