Abstract (en)

[origin: EP0758557A2] The ski has a running surface and an upper support surface with mounting area for a binding etc. An adhesive surface (22) for base-plates (14,15) for the binding (12) is located in the mounting area. One or more positioner elements (23,26) are located on the adhesive surface and/or the underside (28,39) of the base-plates. One or more adhesive areas are located on the top ski layer and/or a carrier plate positioned on it. The areas are connected to the binding base-plates via layers of adhesive (31,33).
