Abstract (en)

[origin: EP0758700A1] The multipurpose construction part (1) is divided into individual surface sections (2). These are connected to each other via spring elements (3), which are integral with the part. The spring elements are loop-shaped, and located on the outside (5) of the individual sections. The elements are located in pairs, and the loops (6) face away from each other. The sections are movable relative to each other due to the spring elements, esp. turnable and/or relatively offset.
