Abstract (en)
[origin: EP0758766A1] An electrostatographic printer comprises means for feeding a web of receiving material (12) along a web path, toner image forming device for forming at least one toner image on at least a first face of the receiving material (12) as it is fed along the web path and fixing means (16) for fixing the toner image onto the receiving material (12). A finishing element (66, 67) positioned downstream of the fixing means (16) contacts the first face of the receiving material (12) while the receiving material is at a temperature above the glass transition temperature T_g of the toner to modify the finish of the toner image. <IMAGE>
