Abstract (en)

[origin: EP0758809A2] The conduit has a lower part (10) mounted under a window breast on a building wall, rear, base and front walls with a T-shaped groove (15) inside the rear wall for locating separating walls. mounting capsules or equipment. An upper part (20) placed on the lower part has a front wall, a cover, a holder and a distance piece which holds the front wall at a distance from the front wall of the lower part, leaving a gap for cabling. A further T-groove (16) on the front wall accepts a T-shaped head on a fixing journal on the distance piece. A closure element (37) with a T-shaped head corresp. to the second groove is rotatably located in a lower bar of the distance piece, which has a lug (32) with an opening (39) for installed equipment items.
