Abstract (en)
[origin: WO9513847A1] Portable equipment for the realization of sports nets and relative support structures, as, for example, soccer goals, volleyball nets, and the like. The net (2) is fixed to a support composed of substantially tubular, inflatable chambers (3, 5) which engage in fastening bases (4) that are, in turn, fixable to the ground. The goal (1) can be easily dismantled by deflating the supports (3, 5), and replacing them in a portable case (20), together with the bases and the folded net, as well as the pickets for fastening the bases to the ground. The bases can be formed of concave shells which can be attached to one another internally to form a case to hold the net and deflated supports. Varying the form of the supports and the net, it is possible also to prepare a volleyball net.
