Abstract (en)

[origin: DE4416707A1] In order to correct the position of a load carrier (34) suspended from a crab (22), a section (50') of the hoisting cable system (32) fitted between the crab (22) and the load carrier (34) is shifted horizontally in relation to the crab (22) at a point near the latter by imparting movement to a component (56) affecting the course of the cable which is guided to be horizontally displaceable and exposed to the action of a moving device (60) supported on the crab (22).
