Abstract (en)

The area (60) filled with luminous paint has the peripheral shape of light bodies, esp. stars. The area can also have the appearance of road traffic signs. The helmet (10) is double-shelled, with a shock-absorbing basic body (12) and an outer decorative shell (14). The paint is applied to the outer decorative shell. In applying the paint, it is originally in powder form which is dissolved in clear lacquer and then applied to the decorative shell by a screen printing process. The paint is applied to the decorative shell whilst it is flat, and the shell is then brought to its plastic form for ultimate shaping by a deep drawn process. The paint used is phosphorescent.

Abstract (de)

Ein Fahrradhelm (10) besitzt auf seiner Außenseite mit selbstleuchtender Farbe ausgefüllte Teilbereiche (60). <IMAGE>
