Abstract (en)

[origin: EP0759396A1] At least one of the rolls of packaging can be axially displaced. A glue applicator unit (28) is positioned between the rolls (10-13) of packaging material at least in their axial overlapping part . The glue applicator is positioned behind the cutter blade (27). The axially movable roll of packaging material (11,12) has an axial drive (25,26) with control (4) connected to the width measuring unit (3) for the roll of material (2). The axially movable roll is positioned on a mobile support (21,22).
