Abstract (en)  
A particulate detergent composition of high bulk density comprises a non-spray-dried homogeneous particulate base powder and other ingredients in the form of separate particles or granules, the other ingredients including from 0.5 to 10 wt% of separate granules of a polycarboxylate polymer, for example, an acrylic/maleic copolymer. The separate polymer granules preferably have an average particle size of at least 300  $\mu$ m, a bulk density of at least 500 g/litre, and comprise at least 80 wt% polymer.
