Abstract (en)

The control unit comprises an activation component (2) that controls a bus coupler (3). An actuator (4) is provided, that is electrically connected to a support for a connector, and controlled by the coupler. The bus coupler is connected to the activation component, and to a set of connectors, that couple it to data transmission lines. At least one load line (8) leads from the actuator to the connector support. At least two sets of connectors are pref. provided on the connector support, for connection of the electrical power lines and the data transmission lines. The arrangement allows the transmission of switch control signals to remote loads, that are addressed over the bus.

Abstract (de)

Kontaktmodul (10) einpassend in Unterputzdosen (11), das auf einer Versorgungsseite Anschlüsse für Installationsleiter (4, 6, 8) und Busleiter und auf einer Verbraucherseite Steckaufnahmen (12) für Installationskomponenten aufweist. Es ist vorgesehen, daß auf seiner Versorgungsseite Klemmvorrichtungen (14) für Leiter vorgesehen sind, von denen eine interne Verdrahtungsmatrix (13) zu den Steckaufnahmen (12) auf der Verbraucherseite führt. <IMAGE>
