Abstract (en)

The invention relates to a method for arranging an image executed in relief on a transparent plate (1), comprising the steps of: arranging on the transparent plate a curable product (6) which can adhere to the transparent plate; placing a shaping mould (8) on which the image for arranging is arranged in mirror image and in relief; pressing on both surfaces; causing the curable product to cure; and releasing the glass surface and the shaping mould after curing. The invention also relates to a device for arranging images on the surface of a transparent plate, comprising: a shaping mould; an image arranged in relief in the shaping mould; means for arranging on a transparent plate a curable product which adheres to the plate material; means for pressing the mould onto the transparent plate; means for causing the curable product to cure; and means for separating the mould from the transparent plate. <IMAGE>
