Abstract (en)
[origin: EP0760414A1] Each of the struts (10) in the door system has an axially aligned thread at its lower end in which a screw (25), having a head (24) with two parallel surfaces (28), engages. The profile (7) has an elongated groove (21) on the upper side (20). The groove has a slot (33) for the passage of the screw, and a channel (22) whose width only slightly exceeds that of the parallel surfaces of the screw head. The channel has two widened sections (23) directly below the slot.
