Abstract (en)
[origin: WO9529817A1] A storage device (10) includes a pair of opposing hooks (12) extending from a clip section (14). The hooks can engage supports such as bars, ridges, beading etc. The clip section is adapted for releasably receiving one or more planar article(s) therein. The device can be used for storing the one or more planar articles in both horizontal and vertical orientations and can be used in conventional or existing filing systems.
