Abstract (en)
A wheelchair comprising at least two rear wheels, two front wheels, a support frame, a seat and a backrest, wherein a body supporting means, in particular the seat, comprises a supporting frame and a cushion arranged on a first side thereof, while the supporting frame has a peripheral edge which surrounds at least partly a central opening, a flap being connected through hinge means to a first side of the peripheral edge, which flap has a surface that is less than the surface of the opening, while setting means are arranged for setting the angle which the flap includes with the plane defined by at least a part of the peripheral edge of the supporting frame, the arrangement being such that the flap during use can at least partly extend within the opening and at least partly carries the cushion, with the cushion conforming in shape to the position of the flap. <IMAGE>
