Abstract (en)
[origin: US5765479A] A dampening unit for an offset printing machine having a plate cylinder which carries a printing form and which is operatively connected to applicator rollers of an inking unit and a dampening unit. The dampening applicator roller receives a dampening medium feed in front of the contact point with the plate cylinder and at least one roller for receiving dampening medium is in contact with the dampening medium applicator roller downstream of this contact point.
