Abstract (en)  
[origin: JPH0958149A] PROBLEM TO BE SOLVED: To provide a photo album which makes it possible to contain positives and negatives together even when the negatives are stored as a film roll or in a patrone. SOLUTION: This photo album has a forward front cover flap 10, a rearward front cover flap 14 and a back 12 in such a manner that the back 12 couples the flap 10 to the flap 14. Many cardboard sheets 16 are fixed to the flap 14, and photos 18 are laminated to the sheets 16. A box base 20 is adhered to the inside of the flap 10, and individual boxes 22 are formed. A film roll or patrone is contained in the box 22. The height of the sidewall 24 of the box 20 is selected so as to be larger than or equal to the diameter of the roll or patrone, and the film is held by the mechanical urging force of the sidewall 24.
